Abstracts

Cable barriers, also known as cable guardrails, wire rope safety barriers, are the main type of flexible road fencing to keep vehicles within limits the right way. Three or four high tension steel wire ropes, mounted on the column, will absorb the maximum energy by stretching to cushion the inevitable shock. Compared to other steel highway guardrails, this one is relatively cheap and easy to install, when its redirection of wrong vehicles is efficient and installed in the right way.

This report contains market size and forecasts of Cable Barriers in global, including the following market information:

Global Cable Barriers Market Revenue, 2017-2022, 2023-2028, (\$ millions)
