CAD-CAM technology is the culmination of decades of contributions by many in the name of manufacturing automation. It is the vision of innovators and inventors, mathematicians and machinists alike, all striving to shape the future and drive manufacturing with technology. The term “CAD-CAM” is generally used to describe the software that is used for design and machining or manufacturing with a CNC Machine. CAD is an acronym for Computer Aided Design and CAM is an acronym for Computer Aided Manufacturing. CAD software is used to create things by designing and drawing, using geometric shapes to construct a model. However, not all manufactured parts have to be designed as a solid 3D model.
