## Abstracts

In an air mattress, apart from the fabric (some use insulation), the only thing that supports the internal structure and bears the weight is the air. There are thick and thin ones. If the air mattress is larger, it can be equipped with an electric inflator to facilitate inflating and deflating. Advantages: Relatively comfortable, light weight, small footprint, easy to carry. Disadvantages: When the temperature is low, ordinary air mattresses are generally insulated. If two people share an air bed, it is easy to interfere with each other.
