Caprylic/Capric Triglycerides also known as MCT Oil or Medium Chain Triglycerides is gaining widespread attention in beauty, cosmetics, and personal use industries due to its oxidative stability and smooth texture. Caprylic/Capric Triglycerides is produced by reacting coconut oil with glycerol through esterification. MCT Oil is not oil; it is an ester which primarily contains the Caprylic and Capric medium chain triglycerides present in the coconut oil. Caprylic/Capric Triglycerides is a clear, colorless and virtually odorless liquid that dispenses quickly at room temperature as compared to its raw material coconut oil which is solid at room temperature.
