A retractable towbar is a towbar solution that can easily be folded out of sight if you are not using it.

A retractable towbar can be easily folded away under the bumper when it is not in use. Offering the same advantages as a detachable towbar, the simple precision rotation mechanism means that a retractable towbar takes seconds to hide away or prepare for use. This type of towbar can be wired into your vehicle's electrical system. A retractable towbar can tow trailers, caravans and boats and is also compatible with a majority of cycle carriers. With a swan-shaped neck, the tow ball doesn't need to be stored separately when folded away, as this too is concealed underneath the bumper.
