A carry deck crane is a small 4 wheel crane with a 360 degree rotating boom housed in the center of the machine. In addition to the rotating boom, the carry deck crane also houses an operator cab at one end underneath the boom. The rear section of the carry deck crane contains the engine. The area above the wheels is a flat deck, ideal for loading and moving materials around a job site. Carry deck cranes offer high power for their smaller size – however the main things these cranes offer are versatility and maneuverability.
