Cone beam computed tomography (CBCT) system is a special type of x-ray equipment that provides 3-D views for more thorough analysis of bone structure and tooth orientation. Rise in geriatric population, wide range of applications of CBCT systems in dental practice, and upsurge in number of patients suffering from dental disease are expected to drive the market growth. Moreover, expanding application of CBCT systems in other medical fields such as breast imaging further boosts the market growth. However, high cost of the devices and image related issues such as lack of clarity are expected to impede the market growth.
