Abstracts

Chain saw oils are specially developed to lubricate the chains and guide rods of modern chainsaws. Selected mineral base oils are used in combination with special additives to reduce chain and sawtooth wear and provide excellent wear, rust and corrosion protection. The saw oil has good low temperature fluidity and is suitable for outdoor application even in winter. At the same time has good adhesion, anti - wear, anti - rust and anti - corrosion and low pour point. Compared with ordinary petroleum-based lubricants, they are degradable and do not pollute the environment.
