Abstracts

Chat Application is a tool that provides real-time voice and text transmission for Internet-based clients. The biggest difference between real-time messaging and e-mail is that you don't have to wait. You don't need to press "transmit and receive" every two minutes. As long as two people are online at the same time, you can send text, files, sounds and images like a multimedia phone. The other party, as long as there is a network, no matter whether the other party is at the end of the earth, or there is no distance between the two sides.
