Clay coated multi-ply virgin board are exceptionally durable, multipurpose, advanced and lightweight material primarily used for custom-built delivery cartons, packaging and spot-of-buying displays. A clay coated multi-ply virgin board consisting of chemical or mechanically treated paper-making fiber with at least one middle ply between a couple of external plies. The benefits of using clay coated multi-ply virgin board over single ply is that the pulp and chemical combination is the same in the board's thickness in a single ply, but the top layer is made of virgin fiber in a multiply paperboard, second layer to upper and other layers will either be made of virgin or recycled fibres.
