Abstracts

Cleansing mud mask is a mud-like mask, which is mainly used for skin cleaning and beauty. After rubbing, it can quickly form a thin film, which can isolate the skin from the outside air, inhibit the evaporation of water, and make the epidermis cuticle soft and pores. Expanded, the temperature of the skin surface rises, the blood circulation is improved, and the skin's absorption of various additives in the mask can be enhanced to achieve the effect of enhancing the physiological function of the skin. When the mask is removed, the impurities and dirt on the skin are also discarded, which not only cleans the skin, but also makes the skin white, tender and comfortable.
