Abstracts

Finger cots are an alternative for areas with lower cleanroom requirements.

Finger cots, unlike gloves, cover only the fingertips. They can be worn on all or even on individual fingers. The scope for finger cots is large. They can be used for handling of sensitive components and for working on sharp-edged products. The most common finger cots are made of Nitrile or Latex. Depending on the work area, normal, antistatic or conductive finger cots are used.

This report contains market size and forecasts of Cleanroom Finger Cots in global, including the following market information:
