## Abstracts

The financial close (FC) market has shifted from mature on-premises offerings to cloud solutions as finance application leaders sought improvements in FC capabilities, enhanced cost control/efficiencies, greater application flexibility and shorter time to value. In addition to providing these advantages, cloud FC solutions are typically easier to use and manage than the previous generation of on-premises offerings. Topics such as the timing of cloud conversions, cloud vendors' product roadmaps and cloud product selection now account for nearly all of Gartner's client advisory conversations about FC. As defined by Gartner, the components of an FC solution support financial accounting processes to help achieve a corporate financial close.
