Cloud hosting is where your site is stored on multiple servers, which lets you pull resources from a variety of different places. This makes cloud hosting a very scalable, reliable, and flexible type of hosting, perfect for sites that experience hikes and dips in things like traffic. Note that there are different types of cloud hosting. Traditional web hosts, such as DreamHost and HostGator, offer cloud hosting packages that are priced similarly as their other web hosting packages (typically in the Shared or VPS range).
