Abstracts

Cognac oil is extracted by the steam distillation from the grapevine, *Vitis vinifera*. Cognac oil is refined to produce brandy, where it is separated from the deposits created during the production of the alcohol. It is a natural component which is also known as wine lees oil provides brandy an exceptional flavor and has a fruity aroma. The main constituent of cognac oil is ethyl pelargonate which is a fruit scented natural compound. Cognac is an essential oil that is highly used for natural perfumers. Cognac oil is skin friendly, no side effects, and free from impurities. It is mainly used in flavors and perfumes to provide a delicate and festive note owing to its rich and tenacious yeasty base. Cognac oil is a part of the Vitaceae family which is native to France. Traditionally, the green cognac oil was the effect of using copper stills to purify the liquid. Cognac oil helps in stimulating hair roots and also improves the movement to the scalp. It is used by high-end natural perfumes manufacturers worldwide to modify certain notes in perfume blends.
