Abstracts

Peanut oil, also referred to as groundnut oil or arachis oil, is a vegetable-derived oil made from the edible seeds of the peanut plant. Though the peanut plant flowers above ground, the seeds or peanuts actually develop underground. This is why peanuts are also known as groundnuts. Peanuts are often grouped with tree nuts like walnuts and almonds, but they are actually a type of legume that belongs to the pea and bean family. Depending on processing, peanut oil can have a wide range of flavors that vary from mild and sweet to strong and nutty.

This report contains market size and forecasts of Cold Pressed Peanut Oil in global, including the following market information:
