Abstracts

Cold pressed seed oils are the oils which are obtained from fruits and seeds by crushing and pressing them with a modern steel press. This process is also known as scarification method. Although these oils, when produced generates heat these are not pre-cooked and thus consequently the oil is considered as cold pressed. Extraction of the oil through cold pressing involves crushing seeds or nuts and forcing out the oil. This solvent or oil extraction method is used to produce the most common cooking oils which are easily found in the market. Cold pressed seed oils market are naturally beneficial oils compared to hotly pressed seed oils. As the seeds and fruits are not roasted before pressing, the flavors and nutritional quality of the oil remains intact. Cooking is the primary use of cold pressed oil. Cold pressed seed oils are safer than hot pressed seed oils and it avoids adverse effects caused by high temperature. It retains the physiologically active substance of the seed and flavors.

This report contains market size and forecasts of Cold Pressed Seed Oils in global, including the following market information:
