Cold storage insulation board is a commonly used engineering construction material. Cold storage is the use of artificial refrigeration to make a very fixed space reach a specified temperature, which is also very convenient for buildings that store items. The cold storage insulation board is the polyurethane cold storage we usually say. Then the polyurethane cold storage insulation board is based on the requirements of the user or the specific project. The polyurethane foam that we generally produce is a sandwich board that is used as insulation material. Insulation materials are now the most common insulation materials in large and medium-sized cold storage.
