Abstracts

Commercial dryers are designed to remove the water content from the fabric on the expense of energy utilization. Commercial dryers work on basic scientific principle of centrifugal force. In the past years, commercial dryers market was mainly concentrated in European countries. With the growing utility of commercial dryers in the places such as hotels, motels, public institution, hospitals and schools, the market expanded in a significant manner and expected to grow in the coming period. Encouraging growth in the travel & hospitality industry is expected to trigger the commercial dryers market. Continued growth will likely to be sustained by the population expansion across the globe. Subsequently, propels the demand growth for the utilization of commercial dryers in the urban localities. Additionally, commercial dryers are sold on the basis of the specification by drum volume and dryer weight capacity. In the U.S., large capacity tumble commercial dryers are mainly gas fired.
