Abstracts

Greenhouses are places for growing plants in a controlled environment. Europe has traditionally been at the forefront of implementing advanced techniques in the commercial greenhouse market. Countries such as The Netherlands, Spain, and France have large areas under greenhouse cultivation. The increasing population and demand for food in developing regions such as Asia-Pacific are boosting the growth of this market. The increasing trend of rooftop farming and the rising population are the two major drivers for the market. However, the high cost of commercial greenhouses, especially technologies such as LED grow light and HVAC systems, is a restraint for the commercial greenhouse market.

This report contains market size and forecasts of Commercial Greenhouse in global, including the following market information:

Global Commercial Greenhouse Market Revenue, 2017-2022, 2023-2028, (\$ millions)

Global Commercial Greenhouse Market Sales, 2017-2022, 2023-2028, (K Units)
