Abstracts

Commercial seeds are the seeds sown for production of an intended crop or used as animal feed or industrial raw material. The increasing global population is escalating the demand for commercial seeds. As commercial seeds yield higher output, the declining global arable land due to rapid urbanization acts as a driver for the demand of commercial seeds. However, factors restraining the global commercial seeds market include hue and cry amongst the common masses in the developed countries against the production of genetically modified crops as they believe it affects the human health due to their altered genes.

This report contains market size and forecasts of Commercial Seeds in global, including the following market information:
