Abstracts

CTRM (commodity trading and risk management) software is specialized trading and risk management software designed for companies involved in commodity trading. Commodity trading is the buying and selling of commodities, the movement and delivery of those commodities, and the associated risk management activities for those commodities. Commodity traders, processors and purchasers use CTRM software to manage physical trades, accounting, derivative trades, position, mark to market, origination, logistics, risk management, procurement, planning and scheduling. CTRM can be used for all asset classes, including agriculture (coffee, cocoa, grains, oilseeds, sugar, rubber, palm, etc.), energy (crude and refined products, natural gas, natural gas liquids, liquefied natural gas, power, coal, renewables), and metals (base metals, refined, steel, scraps, and concentrates).
