Abstracts

Growing consumer demand for safety and driver assistance functions to provide a comfortable and safe riding experience will drive the market for connected motorcycles. The optional accessories of the motorcycle interconnection system have a clear layout and intuitive operation interface to meet various needs such as driving navigation, multimedia applications, and related information query. Wireless Bluetooth can intelligently connect motorcycles, smartphones, and helmets, and you can use the multi-function controller to control various interconnection functions at any time. The electronic instrument cluster is replaced by a large and clear TFT color display. On the new display, you can not only view vehicle information (such as vehicle speed, engine speed, etc.) on the electronic instrument cluster, but also answer calls and use media.
