## Abstracts

At construction and other work sites, a job well done is entirely dependent on being able to see properly. However, this can be a challenge when crews are working in dim conditions or through dark, nighttime hours. While portable, temporary lights can make operating in dark environments a non-issue, not all temporary lights are created equal. To keep things safe, to maintain quality standards, and to keep energy costs down you need bright, efficient lights with the durability to withstand abuse and changes in temperature.
