Abstracts

Consumer mHealth (mobile health) is the practice of medicine and consumer health by using mobile devices. The consumer mHealth uses mobile and wireless technologies to generate data on an individual's biology, daily environment and physiology. mHealth aids in the fast delivery of telemedicine services by using 4G & 3G LTE networks enabled services such as high-speed data transfer and video calling. Mobile health technologies consists of one-way and two-way data applications. One-way data application comprises the flow of information from physician or healthcare practitioner to patients by educative methodology & SMS. The two-way model rely on data access programs, such as remote monitoring and client record access. The consumer mHealth market is expected to witness lucrative growth with healthy CAGR during the forecast period.
