Cardiovascular disease (CVD) like stroke and heart disease are the leading cause of death across the globe. As per World Health Organization (WHO), 30% of the deaths caused globally in 2008 was due to heart disease which accounted for 17.3 Mn. Majority of cardiovascular diseases could be managed by early detection of abnormalities in the functioning of heart. Continuous cardiac monitoring devices are used for observation of cardiac activity. Continuous monitoring of heart is mandatory to assess patient's condition suffering from CVD. Cardiac monitoring devices records and display pressure and electrical waveforms of the cardiovascular system for measurement and treatment.
