Abstracts

Copier paper is a type of an uncoated freesheet grade paper that is utilized for regular copying and printing needs. In comparison to printing papers, the copier papers are light weight and more affordable, as a result, both the type of papers are used interchangeably.

The global copier paper market is classified as per the paper size, thickness, end use, and material type. On the basis of paper size, A4 size paper accounts for the highest market share in global copier paper market. This is credited to the high utilization in consumer printing and commercial sectors, both. A/4 size copier paper holds the most market share in the global copier paper market, owing to high usage in consumer printing and in commercial sectors. The copier paper is created by either recycled pulp or virgin pulp. As per the paper thickness, 50-80 GSM copier paper segment is leading the market because it gives appropriate level of brightness in addition to ensures proper print.
