Abstracts

Crash lock bottom cartons are made up of paperboard and cardboard material that are used for transportation, storage and display of bulkier materials. These light weight and strongly locked cartons help in protecting products from spoilage along with providing product authentication and verification of information of moving goods. On the back of their simple and effective packaging attributes, they are widely used for FMCG products. Additionally, they are used in various industries in day to day operations on the back of their cost effectiveness and light weight properties.
