Abstracts

The Internet allows consumers to shop online globally, purchasing products and services that may be unavailable or prohibitively expensive in their home countries from websites in other countries and from marketplaces such as Alibaba Group's Tmall.com that host multinational merchants. This phenomenon, known as cross-border e-commerce or international e-commerce, is growing as advancing technologies help reduce problems associated with international payments, long shipping times and language barriers – making it possible to shop online anywhere and everywhere by laptop and smartphone.
