## Abstracts

Crustaceans are a group of invertebrate aquatic fauna consisting of many species. Crabs, lobsters, crustaceans, krill, crayfish, prawns and wood lice are the best known crustaceans. Nearly half of the world's total production of crustaceans are produced in China alone. They are majorly consumed as food throughout the world. Crustaceans find wide ranging applications across industries such as food industry, pharmaceutical industry and cosmetic industry. Due to numerous health benefits, crustaceans are finding increasing adoption in the food industry in the form of fresh food, frozen food and even snacks. In the cosmetic industry, crustaceans hold high value. They contain natural compounds that are beneficial for skin tissues.
