Abstracts

Dementia is an umbrella term that describes a set of symptoms including memory loss, difficulties with problem solving, language, thinking, and concentration, as well as periods of mental confusion, and changes in personality and mood. People with dementia may become apathetic and lose interest in activities that they used to enjoy, or they may have difficulty controlling their emotions. Some dementia sufferers can become withdrawn from social interaction, and they may lose empathy for others, and could also suffer from depression. Nowadays the majority of people own a smart phone or tablet device loaded with all manner of apps, making life a little bit easier for all involved.
