Abstracts

Dental restoration is the rehabilitation and restoration of the oral and dental tissues lost as a result of disease, inheritance, or trauma. The restoration is required to fulfil the aesthetic, psychological, and functional needs of the patient that demands co-ordination of multi-professional teams within and outside of dentistry. Various materials that are used in restorative dentistry include dental amalgams, dental cements, dental composites, dental ceramics and dental liners. These materials can be used across different branches of dentistry like prosthodontics, periodontics, and endodontics.
