Market growth is primarily driven by factors such as increase in the prevalence of fungal toe nail infections in the U.S. and Canada, and rising per capita healthcare expenditure across the globe. Easy application of nail paints is also expected to drive demand for dermatophytic onychomycosis drugs. However, adverse effects associated with anti-fungal drugs and lack of awareness about dermatophytic onychomycosis in Asia Pacific, Middle East and Africa, and Latin America are expected to impede growth of the global dermatophytic onychomycosis therapeutics market.
