Abstracts

Diabetes management platform is a digital tool for diabetics and high risk individuals that allow users to self-manage their treatment and directly connect with specialists. These digital tools improves the Quality of Life (QoL) and reduces the health related costs to users. These platforms helps the patient to track health data, connect to specialist, engage in a community exchange, and allows access to knowledge resources and practical tips about diabetes management. These platforms includes advisory applications for smart insulin pens and smartphone based artificial pancreas system that automatically regulates the insulin delivery, reduces the hypoglycaemic attacks and significantly improves the blood glucose level. These tools equip healthcare professionals with data-driven insights into patient's habits, areas of risk and opportunities for parameter changes.
