## Abstracts

Diaphragm vacuum pumps are dry positive-displacement pumps. Diaphragm vacuum pumps are becoming increasingly popular for small to medium size applications as an alternative to oil sealed rotary vane pumps. Because diaphragm pumps offer much higher corrosion resistance and typically require much less service support than oil-sealed pumps. Diaphragm pumps can be extremely low maintenance and quiet. Because the method of operation, the materials of construction can be selected for maximum corrosion resistance with only slight compromises in performance, and no compromises in diaphragm lifetime.
