Digital ad intelligence software monitors competitors' advertising campaigns as well as optimizes ad spend by providing ad revenue data. Companies use digital ad intelligence software to evaluate where competitors are advertising, the ad creatives their competitors are running, and how much their competitors are spending on their ads. Competitive intelligence is a main component of this type of software, as it can help businesses identify which ad creatives are performing best for their competitors (i.e., types of messaging, CTAs, ad sizes and images, etc.). Digital ad intelligence software can also track competitors' key performance indicators, like cost per impression (CPI) and click-through rate (CTR).
