## Abstracts

Digital Printed Fashion Fabric uses a completely different process than screen printed fabric. The digital printed fabric is usually either 100% cotton or 100% linen. For digital printing on fabric, It allows for nearly unlimited creativity for designers. There are very few, if any, restraints when it comes to color, scale, resolution, and design as long as it can be translated into a digital format. AND because it's in a digital format, they can be saved virtually forever. This means they can be reprinted with little to no color variations from batch to batch.

This report contains market size and forecasts of Digital Printed Fashion Fabrics in global, including the following market information:
