Abstracts

A direct dye or substantive dye is a dye that adheres to its substrate, typically a textile, by non-ionic forces. The amount of this attraction is known as 'substantivity': the higher the substantivity the greater the attraction of the dye for the fiber. Substantive dyes work best on textiles with high contents of cellulose, such as cotton. In contrast to direct dyes, wool and leather goods are dyed by the process of ion exchange, exploiting the cationic nature of proteins near neutral pH. The development of substantive dyes helped make mordant dyes obsolete.

This report contains market size and forecasts of Direct Dyes in global, including the following market information:

Global Direct Dyes Market Revenue, 2017-2022, 2023-2028, (\$ millions)

Global Direct Dyes Market Sales, 2017-2022, 2023-2028, (K MT)
