Abstracts

Displays are used to exhibit data or information. They are referred to as retail displays when used in retail applications like POS systems, kiosks, ATMs, and digital signage. They can be both touch-enabled and non-touch displays. A growing number of retailers are using interactive displays to attract customers. Retailers have to make sure that their digital displays are technically perfect to attract customers, given the increased consumer use of high-performance electronic devices such as smartphones and tablets. For instance, responsive screens should react quickly to consumer gestures so that shoppers continue to use them and close the sale.
