The growth in Distributed Denial-of-Service (DDoS) threats due to increasing internet connectivity among a large number of devices ranging from mobile phone to IoT devices is expected to boost the Distributed Denial-of-Service Protection market growth. The first most visible Distributed Denial-of-Service attack was expected to occur in the year 2000 where a large number of multinational companies were affected, where the total cumulative costs of these attacks were expected to cost huge to the companies. Presently the Distributed Denial-of-Service attacks had expanded in terms of rate, volume, technology and landscape from a mere hobby to a particular agenda which include threats from cyber-terrorists, hackers, rival companies, customers, partners etc.
