Abstracts

Herbs are those plants that have a plethora of uses and benefits in different industrial applications. Fresh herbs, however, are perishable and more susceptible to bacteria and fungus. Thus, to prevent the damage of versatile plants, these herb are converted into a dried format. Dried herbs are a result of the water removal from the fresh herbs by using drying techniques such as air drying, microwave drying, and vacuum drying. Drying intensifies the taste of many herbs by concentrating the flavor aspect. Dried herbs find ample of applications in both, the B2B and B2C segments. Dried herbs are extensively used in the B2B sector in food processing applications, cosmetics formulations, and medical remedies.
