Abstracts

In inkjet printing, there are two basic kinds of printheads: Continuous Inkjet (CIJ) heads and Drop-on-Demand (DOD) heads. Drop-on-demand inkjet printing, on the other hand, uses only enough ink to create the image, and DOD printheads can create gradients and greyscale effects at effective resolutions of 1200 dpi and higher. With the use of fast-curing UV-LED based inks, DOD inkjet printers can match the throughput rates of CIJ systems at a fraction of the unit cost.
