Drum liners are typically constructed from polyethylene, and are designed to fit in either steel or plastic drums of various sizes. Available in multiple widths, liners help minimize drum cleaning and replacement (reducing waste) and prevent product contamination. They are used for storing and shipping a variety of materials, such as liquid and raw products, and can hold from a few gallons to over 50 gallons. Drum liners are available in various types, including round bottom, flat bottom, rigid and semi-rigid variations.
