Abstracts

As the demand of the pharmaceutical industry increases, the content of bovine serum albumin is also increasing. Other factors driving the global market are changing consumer preferences for protein-rich diets and high demand from the life sciences industry. Bovine serum albumin is the stable quality of protein standards, making it highly pure and highly soluble in water, making it the product of choice for the pharmaceutical and diagnostic industries. The dry-form segment will occupy the largest market share in the bovine serum market. The dry form of bovine serum albumin is more preferred by manufacturers than the liquid form because it has a longer shelf life. This characteristic of the dry form also leads to an increase in the import and export of bovine serum albumin.
