Abstracts

Dry herb vaporizers heat a ground material to produce a vapor that houses the material's therapeutic properties. Unlike concentrate vaporizers – which can use wax, dabs, or liquids – dry herb vaporizers use a more “natural” form of material. Users typically grind this material themselves. Because vaporizers for dry herb use a more natural material, they are often regarded as having an excellent taste.

This report contains market size and forecasts of Dry Herb Vaporizers in global, including the following market information:

Global Dry Herb Vaporizers Market Revenue, 2017-2022, 2023-2028, (\$ millions)
