Abstracts

A dual-sided ID card printer is an electronic desktop printer with card feeders which can print and personalize plastic cards. Card printers are controlled by printer drivers, and generally ID card printers are designed with striping, laminating, and punching functions. An ID card printer is different from traditional printers due to its hardware features. ID card printers can accept different card thickness & dimensions. Dual-sided ID card printers print on both the sides in a single run; it is cost effective and saves time. It is ideal for large volume ID programs and for organizations that need to print cardholder information on both sides of the card.

This report contains market size and forecasts of Dual-Sided ID Card Printers in global, including the following market information:
