Textile dyestuffs typically include dyes such as acid dyes, basic dyes, direct dyes, disperse dyes, reactive dyes, sulfur dyes and vat dyes. These textile dyes are used to manufacture colored textile fibers. Basic dyes, acid dyes and disperse dyes are principally used in the production of black colored nylon textile fibers. Furthermore, various types of dyes such as reactive dyes, direct dyes and vat dyes are used for dyeing nylon textile fibers for specific applications. Textile dyestuffs are used to dye different types of nylon textile fibers such as monofilament fibers, staple fibers and multifilament fibers. These dyed textile fibers are used in various end-user industries such as home textiles, apparel, automotive textiles, agricultural textiles and protective clothing.
