Abstracts

Compliance training is a broad term describing the process of educating employees on the various state, industry or company mandated laws and regulations that apply to their roles and responsibilities.

Organizational risks vary by industry and market. For some, compliance training is not mandated by law. For others, regulatory compliance training is compulsory. Failure to comply leads to hefty fines, litigation and in some cases, the loss of an operating license.

It is these consequences that makes regulatory compliance training the most significant type of training in an organization.

Compliance training is synonymous with eLearning based on its effectiveness at pushing standardized training program to a large audience.
