Abstracts

With increased demand for animal-based food and to feed the large population, insects are being used as a source of food. Owing to the lower ecological footprint required for the production of insects. Consumption of insects also depends on human health issue and culture. Increased demand for edible insects is also resulting in the development of new technologies used to harvest insects in a more efficient way. Along with harvesting of insects, companies are also focusing on storing edible insects to keep them fresh for a long time. However, there are still some major factors hampering the market growth including safety and health issues, and legislative requirements. Companies are also focusing on developing various edible insect ingredients. Edible insects are also being offered along with the information on their nutrient contents.

This report contains market size and forecasts of Edible Insects in global, including the following market information:

Global Edible Insects Market Revenue, 2017-2022, 2023-2028, (\$ millions)

Global Edible Insects Market Sales, 2017-2022, 2023-2028, (K MT)
