Abstracts

Elder care service providers are continuously growing due to rising number of older patients suffering from disabilities and improving day care facilities. Hence, companies are more focused in wireless connectivity and advanced devices to deliver healthcare services. In order to meet customer needs, elder care service companies are entering into various private care centres because older people tend to choose living in care facilities with specialized services requirements, which are provided in private care centres. Chronic conditions of elderly and preventive care technology are opening up niche markets. Moreover, the driving factor of such day care facilities is the overall cost of the setup, which is comparatively less than hospitalization. The day care facility is provided for 10-12 hours a day and is also expected to fuel elder care services market growth in terms of revenue over the forecast period.
